MAIN MENU   **CREATE REPORT**

This window is opened when the "Reports" button is clicked. If the user has created reports in the past, they will be displayed, named by date and time (if the user creates more than one report in a day), in a box that they can scroll through.

Clicking any date time entry in the box will open the report created on that day.

Below this box, is a button if the user wishes to create a new report.

MAIN MENU

GENE

This window is opened when the "CREATE REPORT" button is clicked.

The top two dropdown lists are for the start and end date range - all statistics in the report will only be collected from these two dates provided by the user. When the dropdown list is clicked, a small calendar will be opened, which is an easy way for the user to select a date.

The third dropdown box is for the user to select the daily, weekly or monthly consumption of food and drink to be displayed in the report. The report will show the average daily, weekly or monthly consumption.

MAIN MENU

GENERATE REPORT

It can be expected that the report will take some time to generate, especially with graph creation and laying out elements on the report.

Therefore, once the user has clicked on the "GENERATE REPORT" button to generate the report, a progress bar can be appear beneath the button.

The progress will be shown to the user through the progress bar, so they have some idea of how long the report creation will take.

[REPORT CONTENTS]

This window will be opened once a new report has been created, or if the user has selected an old report for viewing.

The bottom right panel will contain the actual report itself, with a scrollbar to scroll down the report.

The top right panel contains useful tools for viewing the report:

- the leftmost option is to select a page number. In this example, the user is on page 1 of 59 total pages (the number of pages will be different for each report due to the needs of the user). The number 1 is in an input box, so the user can enter any value here and jump to a page. The value for the total number of pages is not in a text box, and will be unchangeable for the user.

- the middle option is to select a zoom size, in the case the user has accessibility needs and needs to have enlarged viewing for the report. The zoom size percentage can be changed by the user. The default viewing size is 100%, and can be zoomed out to as much as 25%. The maximum zoom size for the user will be 250%.

- the rightmost option is to search for a keyword in the report, which is useful for the user to jump to a specific piece of information or to check for a certain macro or micronutrient without having to skim through large sections. If a word has been found, the number of words with the current word the user is on will be displayed. For example 2/20 means there are 20 instances of the keyword found, and the user is currently viewing the second instance of the keyword. Keywords will be highlighted in the report once found for easy identification by the user. If a keyword is not found, 0/0 will be displayed, and the background of the input box will be a light shade of red, to indicate that the word was not found.

The left panel contains tools for exporting the report and accessing other areas of the application:

- the button "PDF DOWNLOAD" will allow the user to export the report as a PDF, which can be emailed
- the button "CSV DOWNLOAD" will allow the user to export the report as a CSV file, which can be useful to view numeric values
- the button "PRINT" will allow the user to print the report to a local printer

- the button "REPORTS" will allow the user to return back to the "homepage" of reports, where they can view current reports or make a new report. This generated report should be added to the list of reports if it is new.
- the button "MAIN MENU" will allow the user to return to the main menu, so they can access other parts of the application (while still being logged in)
